ANNUAL STATEMENT AS OF DECEMBER 31, 2023 OF THE American National Property And Casualty Company
NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of American National Property And Casualty Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Missouri Department of Insurance.

The Missouri Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Missouri for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Missouri Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the state of Missouri. The state has implemented and adopted certain exceptions to the prescribed accounting practices found in the NAIC Accounting Practices and Procedures Manual and the Director of Insurance has the right to permit other specific practices that deviate from prescribed practices ("permitted practice").

The Company has been granted a permitted practice from the Missouri Department of Insurance to admit the statutory equity of American National Lloyds Insurance Company in accordance with NAIC SAP. The Company owns 100% of the outstanding common stock of ANPAC Lloyds Insurance Management, Inc., the attorney-in-fact for American National Lloyds Insurance Company. The Company is allowed to "look through" to the statutory capital and surplus of the underlying insurance company, American National Lloyds Insurance Company, in its valuation of its investment in American National Lloyds Insurance Management, Inc.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the state of Missouri is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Generally, such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

E. Product Warranties

Not applicable - The Company has no liability for product warranties.

F. Joint and Several Liabilities

Not applicable - The Company has no joint and several liability arrangements.

G. All Other Contingencies

(1) The Company, consistent with the insurance industry in general, is a defendant in various lawsuits from time to time, which may concern alleged breaches of contracts, various employment matters, allegedly deceptive insurance sales and marketing practices, and miscellaneous other causes of action arising in the ordinary course of operations. Certain of these lawsuits may include claims for compensatory and punitive damages. We record accruals for these items to the extent we deem the losses probable and reasonably estimable. After reviewing the existing litigation with legal counsel, based upon information presently available, management is of the opinion that the ultimate resultant liability, if any, would not have a material adverse effect on the Company's financial position, liquidity or results of operations; however, assessing the eventual outcome of litigation necessarily involves forward-looking speculation as to judgments to be made by judges, juries and appellate courts in the future.

Such speculation warrants caution, as the frequency of large damage awards, which bear little or no relation to the economic damages incurred by plaintiffs in some jurisdictions, continues to create the potential for an unpredictable judgment in any given lawsuit. As lawsuits are typically in various stages of development, future facts and circumstances could result in management changing its conclusions. It is possible that, if the defenses in these lawsuits are not successful, and the judgments are greater than management can anticipate, the resulting liability could have a material impact on our financial position, liquidity or results of operations. With respect to any existing litigation, management currently believes that the possibility of a material judgment adverse to the Company is remote and no estimate of range can be made for loss contingencies that are at least reasonably possible but not accrued.

(2) As a condition of its license to do business in various states, the Company is required to participate in a variety of mandatory residual market mechanisms (including mandatory pools) which provide certain insurance (most notably automobile insurance) to consumers who are otherwise unable to obtain such coverages from private insurers. The amount of future losses or assessments from residual market mechanisms cannot be predicted with certainty and could have a material adverse effect on the Company's future results of operations.

(4) The market values of equity and debt securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) The Company does not own any derivative securities.

B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

Equity and fixed income securities are priced by independent pricing services. The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

ANNUAL STATEMENT AS OF DECEMBER 31, 2023 OF THE American National Property And Casualty Company
NOTES TO FINANCIAL STATEMENTS

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

Additionally, the Company holds a small amount of fixed maturities that have characteristics that make them unsuitable for matrix pricing. For these fixed securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3. The pricing of certain private placement debt also includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, and are classified in Level 3.

For public common stocks, the Company receives prices from a nationally recognized pricing service that are based on observable market transactions and these securities are disclosed in Level 1.

LIHTC Investments are valued at amortized cost supported by annual schedules from the partnerships. The Company believes that the carry value of these investments approximates fair value.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three- level fair value hierarchy as described above in the Note 20A.

2023 Statement of Actuarial Opinion

American National Property and Casualty Company

Identification

I, Gregory R. Chrin, am a Specialist Leader with the firm of Deloitte Consulting LLP. I am a Fellow of the Casualty Actuarial Society. I was appointed by the Board of Directors of American National Property and Casualty Company (the "Company") on November 2, 2023 to render this opinion. I meet the definition of a Qualified Actuary per the NAIC Annual Statement Instructions – Property and Casualty, Actuarial Opinion. I have provided my Qualification Documentation to the Board of Directors through the Company's management.

The intended purpose of this opinion is to satisfy the requirement for such an opinion under the NAIC Annual Statement Instructions. The intended users of this opinion are Company management ("Management"), its Board of Directors, and state insurance department regulators. The loss and loss adjustment expense reserves are the responsibility of Management. My responsibility is to express an opinion on those reserves based on my review.

Scope

I have examined the reserves listed in Exhibit A, as shown in the Annual Statement of the Company as prepared for filing with the state regulatory officials, as of December 31, 2023. The loss and loss adjustment expense and long duration unearned premium reserves ("reserves") specified in Exhibit A, where applicable, include provisions for disclosure items (Disclosures 8 thru 13.2) in Exhibit B. I have reviewed the December 31, 2023 loss and loss adjustment expense and long duration unearned premium reserves recorded under U.S. Statutory Accounting Principles. My review considered data evaluated as of December 31, 2023 and additional information provided to me through the date of this opinion.

In forming my opinion on the loss and loss adjustment expense and long duration unearned premium reserves, I relied upon data prepared by Forozan Nasery, Senior Vice President and Chief Accounting Officer of the Company. I evaluated that data for reasonableness and consistency. In performing this evaluation, I have assumed that the Company (a) used its best efforts to supply accurate and complete data and (b) did not knowingly provide any inaccurate data. I also reconciled that data to Schedule P - Part 1 of the Company's current Annual Statement. In other respects, my examination included the use of such actuarial assumptions and methods and such tests of the calculations as I considered necessary.

My review was limited to items listed in Exhibit A, and did not include an analysis of any other balance sheet items. I have not examined the assets of the Company and I have formed no opinion as to the validity or value of these assets. My opinion on the reserves is based upon the assumption that all reserves are backed by valid assets that have suitably scheduled maturities and/or adequate liquidity to meet the cash flow requirements of the liabilities.

Opinion

In my opinion, the amounts carried in Exhibit A on account of the items identified:

- (A) meet the requirements of the insurance laws of the State of Missouri;
- (B) are consistent with reserves computed in accordance with accepted actuarial standards;
- (C) make a reasonable provision in the aggregate, both net of ceded reinsurance and direct and assumed, for all unpaid loss and loss adjustment expense obligations of the Company under the terms of its contracts and agreements;
- (D) make a reasonable provision for the unearned premium reserves for long duration contracts of the Company under the terms of its contracts and agreements.

Relevant Comments

A. Company-Specific Risk Factors

Actuarial estimates of property and casualty loss and loss adjustment expense unpaid claims are inherently uncertain because they are dependent on future contingent events. Also, these unpaid claim estimates are generally derived from analyses of historical data, and future events or conditions may differ from the past. The actual amount necessary to settle the unpaid claims may therefore be significantly different from the reserve amounts listed in Exhibit A.

The major factors and/or particular conditions underlying the risk and uncertainties that I consider relevant to the Company's estimates of unpaid losses and loss adjustment expenses as of December 31, 2023 are described in the section below. These include but are not necessarily limited to:

- Changes in inflation or in the expected persistence of inflation (e.g. wage, social, medical, cost of goods sold)

B. Risk of Material Adverse Deviation

With respect to this Statement of Actuarial Opinion, the amount of adverse deviation that I consider to be material is \$148,094,073, which represents the minimum of the following items:

- 20% of surplus
- the reduction in surplus that would result in additional action based on the NAIC Risk-Based Capital formula, assuming no change in the Authorized Control Level capital
- 10% of net loss and loss adjustment expense reserves, if that amount is greater than the difference between the Total Adjusted Capital and the Company Action Level capital (i.e. the NAIC Bright Line Indicator Test)

This amount represents a reasonable upward fluctuation in reserves from those carried by the Company that would be material to surplus. My selection of the materiality standard was driven by the fact that this opinion is prepared for the regulatory review of the Company. Other measures of materiality might be used for reserves that are being evaluated in a different context.

In my analysis, I considered the aforementioned risk factors and the implications of uncertainty in estimates of unpaid losses and loss adjustment expenses in determining a range of reasonable unpaid claim estimates. I have also observed that the difference between the Company's carried reserves for losses and loss adjustment expenses and the high end of my range of reasonable unpaid claim estimates is less than my materiality standard. I further considered whether there are significant risks and uncertainties that could result in material adverse deviation.

In light of the materiality considerations within this analysis, and after considering the potential risks and uncertainties that could bear on the Company's reserve development, I concluded that those risks and uncertainties would not reasonably be expected to result in material adverse deviation in the Company's carried reserves for unpaid losses and loss adjustment expenses.

C. Other Disclosures in Exhibit B

Salvage and Subrogation

The Company's reserves listed in Exhibit A are established net of anticipated salvage and subrogation. Anticipated salvage and subrogation disclosed in item 8 of Exhibit B is 4% of the Company's policyholders surplus.

Discounting

Management has informed me that the Company does not discount the reserves listed in Exhibit A for the time value of money.

Underwriting Pools or Associations

Management has informed me that the Company participates in a small number of voluntary and involuntary pools. Company practice is to record the loss and loss adjustment expense reserves reported to it by the pools with accrual for any reporting lag. Reserve exposure with respect to pools is considered immaterial.

Asbestos Exposures and Environmental Exposures

Management has informed me that the Company has exposure to asbestos and environmental claims. The Company has not provided coverage that could reasonably be expected to produce material levels of asbestos and/or environmental liability claims activity.

Disclosure of Total Claims Made Extended Loss and Loss Expense Reserves

Management has informed me that the Company does not provide extended reporting coverage at no additional charge in the event of death, disability, or retirement of the insured.

Disclosure of Accident and Health (A&H) Long Duration Contracts

Management has informed me that the Company does not write A&H policies with contract terms of thirteen months or greater and for which contract reserves are required.

Disclosure of Unearned Premium Reserves for Property and Casualty (P&C) Long Duration Contracts

The Company writes single or fixed premium policies with coverage periods of thirteen months or greater. The long duration unearned premium reserves are \$138,058,441 on a direct and assumed basis, and \$1,015,636 on a net basis. The long duration unearned premium reserves on a direct and assumed basis and net basis are immaterial.

D. Reinsurance

Reinsurance Collectability

I have examined the Company's Schedule F. Based on this examination, 99% of ceded reserves for losses and loss adjustment expenses are with mandatory pools or with companies that are rated A- or better by a recognized rating agency. Management has informed me that it is not aware of any reinsurance collectability problems other than \$94,000 in dispute that is not included in the Annual Statement, which is immaterial to the reserves subject to this opinion. With respect to loss and loss adjustment expense reserves net of ceded reinsurance, I have not anticipated any contingent liability that could arise if any of the reinsurers prove unable to meet their loss and loss adjustment expense obligations under the terms and conditions of their contracts with the Company.

Retroactive Reinsurance, Financial Reinsurance

Based on discussions with Management and its description of the Company's ceded and assumed reinsurance, I am not aware of any reinsurance contract that either has been or should have been accounted for as retroactive reinsurance or financial reinsurance.

E. NAIC IRIS Tests

I reviewed the results of the following NAIC IRIS Tests: One Year Reserve Development to Surplus, Two Year Reserve Development to Surplus, and Estimated Current Reserve Deficiency to Surplus as calculated by Management. No exceptional values were calculated for these tests.

F. General Uncertainty

In evaluating whether the reserves make a reasonable provision for unpaid losses and loss adjustment expenses, it is necessary to project future loss and loss adjustment expense payments. It is certain that actual future losses and loss adjustment expenses will not develop exactly as projected and may, in fact, vary significantly from the projections. No warranty is expressed or implied that such variance will not occur. Further, my projections make no provision for the broadening of coverage by legislative action or judicial interpretation or for extraordinary future emergence of new classes of losses or types of losses not sufficiently represented in the Company's historical database or which are not yet quantifiable.

Actuarial Report

An actuarial report and underlying actuarial workpapers supporting the findings expressed in this Statement of Actuarial Opinion will be provided to the Company to be retained for a period of seven years in the administrative offices of the Company and available for regulatory examination.

This opinion is provided for regulatory purposes only and is not intended for any other purpose.
