NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of American National Lloyds Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance.

The Texas Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Texas for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Texas Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the state of Texas. The state has implemented and adopted certain exceptions to the prescribed or permitted accounting practices found in NAIC Statutory Accounting Principles (SAP) and the Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices (permitted practice).

As of the date of this report, the Company has not implemented any such exceptions, has not requested permission for a permitted practice, nor been directed by the state of Texas to implement any accounting practice unique to the Company.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the state of Texas is shown below:

(2) At September 30, 2023, the Company did not have any securities within the scope of SSAP No 43R with a recognized other-than temporary impairment due to the intent to sell or an inability or lack of intent to retain the security for period of time sufficient to recover the amortized cost basis.

(3) At September 30, 2023, the Company did not hold any loan-backed and structured securities with a recognized credit-related OTTI.

(4) Loan-backed and structured securities in unrealized loss positions are as follows:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ (8,498)
2. 12 Months or Longer	\$ —

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$ 566,382
2. 12 Months or Longer	\$ —

As of September 30, 2023, the Company believes it has the intent and ability to hold securities long enough to allow the cost basis of these securities to be recovered. Although the investment securities above did not meet management's criteria for other-than-temporary impairment at this time, it is possible that future events or information could cause them to conclude that declines in value are other-than-temporary.

(3) Transfer between levels, if any, are recognized at the beginning of the reporting period.

STATEMENT AS OF SEPTEMBER 30, 2023 OF THE American National Lloyds Insurance Company
NOTES TO FINANCIAL STATEMENTS

(4) The market values of equity and debt securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) The Company does not own any derivative securities.

B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. An asset or liability's classification within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, the pricing service uses an Option Adjusted Spread model to develop prepayment and interest rate scenarios.

Equity and fixed income securities are priced by independent pricing services. The pricing service evaluates each asset class based on relevant market information, relevant credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities additional inputs may be necessary.

The Company has reviewed the inputs and methodology used by the pricing service and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review of the pricing service's methodology confirms the service is utilizing information from organized transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received by the pricing service.

The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available. If the pricing service discontinues pricing an investment, the Company would be required to produce an estimate of fair value using some of the same methodologies as the pricing service, but would have to make assumptions for market-based inputs that are unavailable due to market conditions.

The fair value estimates of most fixed maturity investments including municipal bonds are based on observable market information rather than market quotes. Accordingly, the estimates of fair value for such fixed maturities provided by the pricing service are included in the amount disclosed in Level 2 of the hierarchy.

Additionally, the Company holds a small amount of fixed maturities that have characteristics that make them unsuitable for matrix pricing. For these fixed securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3. The pricing of certain private placement debt also includes significant non-observable inputs, the internally determined credit rating of the security and an externally provided credit spread, and are classified in Level 3.

For public common stocks, the Company receives prices from a nationally recognized pricing service that are based on observable market transactions and these securities are disclosed in Level 1.

LIHTC Investments are valued at amortized cost supported by annual schedules from the partnerships. The Company believes that the carry value of these investments approximates fair value.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described above in the Note 20A.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 70,148,561	\$ 78,881,284	\$ 2,528,718	\$ 67,619,843	\$ —	\$ —	\$ —
Cash, cash equivalents and short-term investments	\$ 21,477,160	\$ 21,477,161	\$ 14,495,500	\$ 6,981,660	\$ —	\$ —	\$ —
Other invested assets	\$ 3,475,000	\$ 3,475,000	\$ —	\$ 3,475,000	\$ —	\$ —	\$ —

NOTE 23 Reinsurance

Prior to January 1, 2023, select excess & surplus lines written by the Company were ceded to American National Property And Casualty Company (ANPAC), direct parent of the Company. Effective January 1, 2023, all excess & surplus lines written by the Company are being ceded 100% to ANPAC.

NOTE 24 Retrospectively Rated Contracts & Contracts Subject to Redetermination

The Company's CA\$HBACK program refunds the policyholder 25% of the qualifying auto and homeowner premiums if the policyholder remains claim free for a period of three years. The Company estimates retrospective premium adjustments by the application of the historical ratio of return premium to original qualifying CA\$HBACK premium. This ratio is applied to the qualifying eligible CA\$HBACK premium to determine future retrospective return premium. The Company records accrued retrospective return premium as an adjustment to earned premiums.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

A. Incurred losses and loss adjustment expenses attributable to insured events of prior years have increased by \$3,944,000 in 2023. This change is the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims and such adjustments are included in current operations.

B. There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses.
