STATEMENT AS OF SEPTEMBER 30, 2023 OF THE Garden State Life Insurance Company
NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Garden State Life Insurance Company (the "Company") are presented on the basis of accounting practices prescribed or permitted by the State of Texas Department of Insurance ("TDI").

The TDI recognizes only statutory accounting practices ("SAP") prescribed by the State of Texas for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Texas Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Texas. The state has implemented and adopted certain exceptions to the prescribed accounting practices found in the NAIC SAP and the Insurance Commissioner of the State of Texas has the right to permit other specific practices that deviate from prescribed practices.

As of the date of this report, the Company has not implemented any such exceptions, has not requested permission for a permitted practice, nor been directed by the State of Texas to implement any accounting practice unique to the Company.

The following table presents a reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed or permitted by the State of Texas:

The guidance sunsets in 2025 and is effective for 3Q2023 statutory reporting. See note 21C for additional detail.

D. Loan-Backed Securities

(1) Prepayment assumptions for mortgage-backed/asset-backed securities were obtained from independent third party pricing services or internal estimates.

(2) At September 30, 2023, the Company did not have any securities within the scope of SSAP No 43R with a recognized other-than temporary impairment due to the intent to sell or an inability or lack of intent to retain the security for period of time sufficient to recover the amortized cost basis.

(3) At September 30, 2023, the Company did not hold any loan-backed and structured securities with a recognized credit-related OTTI.

(4) Loan-backed and structured securities in unrealized loss positions are as follows:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$	(31,761)
2. 12 Months or Longer	\$	—

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$	1,216,940
2. 12 Months or Longer	\$	—

(5) All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. As of September 30, 2023, the Company believes it has the intent and ability to hold securities long enough to allow the cost basis of these securities to be recovered. Although the investment securities above did not meet management's criteria for other-than-temporary impairment at this time, it is possible that future events or information could cause them to conclude that declines in value are other-than-temporary.

(3) Transfers between levels, if any, are recognized at the end of the reporting period.

(4) During the current reporting period, the fair value of the Company's investments in Level 3 totaled \$1,914,149. The market values held as equity and fixed income securities are obtained from various pricing services. There has been no change in the valuation techniques and related inputs.

(5) Not applicable - The Company does not own any derivative securities.

B. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability. A fair value hierarchy is used to determine fair value based on a hypothetical transaction at the measurement date from the perspective of a market participant. American National has evaluated the types of securities in its investment portfolio to determine an appropriate hierarchy level based upon trading activity and the observability of market inputs. The classification of assets or liabilities within the fair value hierarchy is based on the lowest level of significant input to its valuation. The input levels are defined as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 - Quoted prices in markets that are not active or inputs that are observable directly or indirectly. Level 2 inputs include quoted prices for similar assets or liabilities other than quoted prices in Level 1; quoted prices in markets that are not active; or other inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect American National's own assumptions about the assumptions that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models and third-party evaluation, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The Company has evaluated the various types of securities in its investment portfolio to determine an appropriate fair value hierarchy level based upon trading activity and the observability of market inputs. Based on the results of this evaluation and investment class analysis, each price was classified into Level 1, 2, or 3.

STATEMENT AS OF SEPTEMBER 30, 2023 OF THE Garden State Life Insurance Company
NOTES TO FINANCIAL STATEMENTS

Bonds - The Company utilizes a pricing service to estimate fair value measurements. The fair value for fixed maturity securities that are disclosed as Level 1 measurements are based on unadjusted quoted market prices for identical assets that are readily available in an active market. The estimates of fair value for most fixed maturity securities, including municipal bonds, provided by the pricing service are disclosed as Level 2 measurements as the estimates are based on observable market information rather than market quotes. The pricing service utilizes market quotations for fixed maturity securities that have quoted prices in active markets. Since fixed maturity securities generally do not trade on a daily basis, the pricing service prepares estimates of fair value measurements for these securities using its proprietary pricing applications, which include available relevant market information, benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. Additionally, an option adjusted spread model is used to develop prepayment and interest rate scenarios.

The pricing service evaluates each asset class based on relevant market information, credit information, perceived market movements and sector news. The market inputs utilized in the pricing evaluation, listed in the approximate order of priority, include: benchmark yields, reported trades, pricing source quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, and economic events. The extent of the use of each market input depends on the asset class and the market conditions. Depending on the security, the priority of the use of inputs may change or some market inputs may not be relevant. For some securities, additional inputs may be necessary.

The Company has reviewed the inputs and methodology used and the techniques applied by the pricing service to produce quotes that represent the fair value of a specific security. The review confirms that the pricing service is utilizing information from observable transactions or a technique that represents a market participant's assumptions. The Company does not adjust quotes received from the pricing service. The pricing service utilized by the Company has indicated that they will only produce an estimate of fair value if there is objectively verifiable information available.

The Company can hold a small amount of private placement debt and fixed maturity securities that have characteristics that make them unsuitable for matrix pricing. For these securities, a quote from a broker (typically a market maker) is obtained. Due to the disclaimers on the quotes that indicate that the price is indicative only, the Company includes these fair value estimates in Level 3.

Common Stock - For public common stocks, prices are received from a nationally recognized pricing service that are based on observable market transactions, and these securities are classified as Level 1 measurements.

Short-term investments - Short-term investments are primarily commercial paper rated A2 or P2 or better by Standard & Poor's and Moody's, respectively. Commercial paper is carried at amortized cost which approximates fair value. These investments are classified as Level 2 measurements.

For other financial instruments discussed below, the Company believes that their carrying value approximates fair value. This assumption is supported by the qualitative information discussed below. These financial instruments are classified as Level 3 measurements.

Policy Loans - The carrying value of policy loans is the outstanding balance plus any accrued interest. Due to the collateralized nature of policy loans such that they cannot be separated from the policy contracts, the unpredictable timing of repayments and the fact that settlement is at outstanding value, the Company believes the carrying value of policy loans approximates fair value. These investments are classified as Level 3 measurements.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described above in the Note 20A.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 15,358,731	\$ 16,247,706	\$ 2,104,896	\$ 13,253,835	\$
